

RESEARCH AND PRODUCTION COMPANY

TECHVAGONMASH

Special process equipment for
transport machine building
enterprises

Kawasaki Robot
AUTHORIZED INTEGRATOR

ABOUT THE COMPANY

Research and production enterprise "Techvagonmash" has a forty-year experience of design and manufacturing of special process equipment for enterprises of transport machine building.

Our company is a legal successor of VNIPTIvagon (All-union scientific research design-technological institute of railway-car building) – head technological organization on design of transport machine building enterprises.

The main areas of the company's activity are:

- comprehensive design and equipping of transport machine building enterprises;
- design and manufacturing of special process equipment for railroad cars manufacture;
- process equipment for railroad cars repair;
- robot-operated welding units;
- shotblasting equipment;
- spray-and-drying cabinets;
- filter-ventilating equipment;
- equipment for construction and repair of oil pipelines, gas pipelines.

DESIGN-ENGINEERING DEPARTMENT

Design of manufactured equipment is performed by means of computerized technique with cutting-edge CAD systems.

Special analysis systems are used at the design stage during performance of most mechanical calculations of parts and units of the manufactured products, dynamic analyses and modal analysis of equipment structures.

These systems allow to perform stress analysis, stability loss analysis, optimization, frequency and thermal analyses, vibration and shock strength calculations.

Capabilities of these software products allow the specialists of our company to determine the reliability of the structure fast and precisely at the design stage, as well as to complete any assigned task.

PROCESS ENGINEERING DEPARTMENT

IT IS A HIGHLY PROFESSIONAL TEAM WHICH PERFORMS COMPLEX DESIGN OF TECHNICAL REEQUIPMENT AND SETTING-UP OF NEW CAPACITIES OF THE TRANSPORT MACHINE BUILDING ENTERPRISES.

During the last two years the department has developed and issued project documentation on the following plants:

“Vagonmash” JSC – project of modern subway cars manufacturing organization;

“Orsk Railway Car Building Plant” JSC – organization of freight cars manufacturing and repair;

“Kazakhstan Railway Car Building Company” LLP – organization of manufacturing of freight cars based on “Taman” railway car shed, Ekibastuz;

“Osipovichi Railway Car Building Plant” CJSC – organization of manufacturing of tank containers and freight cars;

“Roslavl Railroad Car Repair Plant” JSC – gondola cars manufacturing organization;

“Zheldorekspeditsiya” LLC – organization of manufacturing of luggage cars;

“Popasna Railroad Car Building Plant” ALC – organization of gondola cars manufacturing.

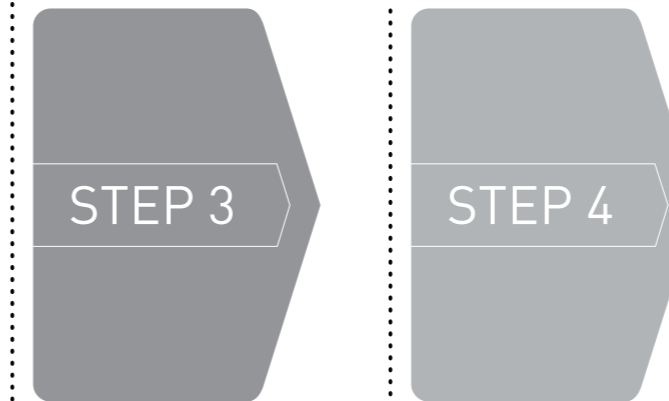

FROM DESIGN TO TURNKEY

Pre-design works

Detail design

Designing of special process equipment

Manufacturing of special process equipment

Supervised installation and commissioning, training of the personnel

The competitive advantage of the Research and Production Enterprise "Techvagonmah" is that the company provides a full set of services from the design stage to the supervised installation and commissioning stage including manufacture of special process equipment.

PRODUCTION

Independent audit, performed by the representatives of TÜV Rheinland (Germany) – a world leader in the sphere of quality management systems certification confirmed the compliance of the Research and Production Enterprise “Techvagonmash” quality management system to the requirements of international standard ISO 9001:2008.

MACHINING DEPARTMENT

performs the whole range of machining works.

The department is fitted up with:

- up-to-date multipurpose equipment;
- machining centers;
- equipment with CNC.

ASSEMBLY-WELDING DEPARTMENT

is completely fitted up with up-to-date welding equipment made by Fronius company.

The main workers of the assembly-welding department are highly qualified metalworkers and welders.

BLANK PREPARATION DEPARTMENT

is fitted up with up-to-date automated equipment for plasma and gas cutting, for metal bending.

Cutting of profiled metal-roll is performed on the up-to-date band saw machines.

All the metal-roll going into production, is descaled and derusted in the shot blasting chamber.

Welding specialists completed training in Paton Electric Welding Institute, and at present the enterprise is undergoing certification on the welding quality requirements in accordance with ISO 3834.

PRODUCT RANGE

SHOT BLASTING AND PRESERVATION LINES FOR METAL-ROLL

Shot blasting and preservation line for metal roll

Shotblasting chamber for cleaning of metal-roll

Spray chamber

SHOT BLASTING EQUIPMENT

AUTOMATED STORAGE SYSTEMS FOR METAL-ROLL

Automated storage system for section material

Automated storage system for sheet products

ROTATORS WITH VERTICAL LIFT

Rotator with vertical lift for electric locomotive underframes welding, load carrying capacity 40 t

Rotator with vertical lift, load carrying capacity 10 t

Rotator stand for double-deck passenger cars underframes welding, load carrying capacity 10 t

Rotator with vertical lift, load carrying capacity 4,5 t

Rotator with vertical lift for passenger cars roofs welding

EQUIPMENT FOR CAR UNDERFRAME ASSEMBLY AND WELDING

Overhead rotator

Rotator for underframe welding

Gondola car underframes assembly and welding stand

Multipurpose jig for assembly and welding of passenger car underframes

STAND FOR AUTOMATIC WELDING OF CENTER SILL WITH I-BEAM

ROBOTIC CENTER FOR CENTER SILL LONGITUDINAL SEAM WELDING

CENTER SILL ASSEMBLY STAND

LINE FOR BODY SIDE FRAMES MANUFACTURING

CAR UNDERFRAMES DRILLING AND RIVETING LINE

AUTOMATED LINE FOR CENTER SILL DRILLING

STANDS FOR ASSEMBLY AND WELDING OF CAR CROSSBEARERS

Bolsters assembly and welding line

Front beams assembly stand

Intermediate beams assembly and welding line

LINE FOR ROBOIC WELDING OF CAR CROSSBEARERS

Gondola car underframes assembly and welding stand

EQUIPMENT FOR ASSEMBLY AND WELDING OF SIDE WALLS

Gondola car side walls assembly and welding line

Jig-rotator for passenger car side walls assembly and welding

EQUIPMENT FOR ASSEMBLY AND ROBOTIC WELDING OF END WALLS

EQUIPMENT FOR BODY ASSEMBLY AND WELDING

Gondola car body assembly and welding stand

Rotator for body welding

Roller-type jacks

EQUIPMENT FOR CAR ROOF ASSEMBLY AND WELDING

Assembly and welding stand for passenger car roof sheathing

Boxcar roof assembly and welding stand

Rotator for roof welding

AUTOMATED LINE
FOR CENTER SILL I-BEAM AND BOTTOM CORD MANUFACTURE

EQUIPMENT FOR TANKS AND VESSELS MANUFACTURE

Tank assembly and welding line

Head-to-shell assembly stand

EQUIPMENT FOR GONDOLA CAR HATCH COVERS MANUFACTURE

Integrated mechanized line for assembly and welding of gondola car hatch covers

Stand for recess-making

Heads measuring and selection stand

Sheet assembly and welding line

Tank head assembly and welding, edges trimming stand

EQUIPMENT FOR RAILROAD CARS BRAKE SYSTEM MANUFACTURE

Rod tension test stand

Head-to-shell assembly stand

Stand for automatic head-to-shell welding

Resistance welding plant for rods

Shotblasting plant for cleaning of pipes inner surface

Pipes magnetic particle inspection stand

Bath for pipes testing

UTILITY VEHICLES

Transfer table

Transfer table

Transporting carriage

Transfer table

Turn-table

EQUIPMENT FOR SURFACE PREPARATION AND PAINTING

Spray and drying cabinet

Lifting platforms for operators

Spray and drying cabinet

Shotblasting chamber for cars

Shotblasting chamber for car underframes

ELEVATING SCAFFOLD

QUALITY SYSTEM

COMPANY'S POLICY IN THE SPHERE OF QUALITY ASSURANCE IS AIMED AT MEETING THE HIGHEST REQUIREMENTS OF THE CUSTOMERS, AND IT IS BASED ON OVERALL OBSERVATION OF NATIONAL AND INTERNATIONAL QUALITY STANDARDS, ON PRODUCTION CERTIFICATION AND ALL PRODUCT TYPES CERTIFICATION.

Independent audit, performed by the representatives of TÜV Rheinland (Germany) – a world leader in the sphere of quality management systems certification confirmed the compliance of the Research and Production Enterprise “Techvagonmash” quality management system to the requirements of international standard ISO 9001:2008.

PATENTS

Research and Production Enterprise “Techvagonmash” owns a great number of know-how, patents and engineering solutions related to constructive decisions of output and developed products.

REFERENCE LIST

Our customers are large-scale enterprises of transport machine-building, metal structures manufacture plants, power machine building enterprises.

During the last years our enterprise has developed a number of projects and has taken part in equipping of all railroad car building plants which are under construction.
